05	Day 9, Day 10	Module 5: Ethics in Technology and Business • Ethical Challenges in Emerging Technologies (AI, Big Data, Cybersecurity, Biotechnology) • Business Ethics: Fair Trade, Consumer Rights, and Corporate Governance • Ethical Marketing and Advertising Practices • Data Privacy, Surveillance, and Ethical AI Development
06	Day 11, Day 12	Module 6: Legal and Regulatory Aspects of Ethics • Role of Law in Professional Ethics • Compliance with Ethical and Legal Standards • Intellectual Property Rights and Plagiarism

		Ethical Implications of Globalization
07	Day 13, Day 14	Module 7: Ethical Leadership and Social Responsibility - Ethical Leadership and Decision-Making - Role of Culture and Religion in Ethical Practices - Social Responsibility and Environmental Ethics - Strategies for Creating an Ethical Workplace
	Day 15	Class Test – 02
08	Day 16	Module 8: Introduction to Technology Transfer - Definition and Importance of Technology Transfer - Historical Evolution of Technology Transfer - Role of Universities, Research Institutions, and Industries - Challenges and Barriers in Technology Transfer
09	Day 17, Day 18	Module 9: Intellectual Property Rights (IPR) and Technology Transfer - Overview of IPR (Patents, Trademarks, Copyrights, and Trade Secrets) - Patenting Process and IP Protection Strategies - Licensing Agreements and IP Valuation - Open Source and Open Innovation
10	Day 19, Day 20	Module 10: Technology Transfer Models and Strategies - University-Industry Collaboration - Government and Public-Private Partnerships - Startups, Spin-offs, and Incubators - Licensing vs. Direct Commercialization
	Day 21	Class Test – 03
11	Day 22	Module 11: National and International Technology Transfer Policies - National Technology Transfer Regulations - International Agreements (WTO-TRIPS, WIPO, Regional Policies) - Case Studies on Successful Technology Transfer Policies - Role of Government in Innovation Policy
12	Day 23, Day 24	Module 12: Commercialization and Business Development - Steps in Commercializing New Technologies - Market Assessment and Business Models - Funding and Investment Strategies - Risk Management in Technology Commercialization
13	Day 25, Day 26	Module 13: Ethical, Legal, and Social Implications - Ethical Considerations in Technology Transfer - Technology Transfer and Sustainable Development - Policy Challenges in Emerging Technologies (AI, Biotechnology, Green Tech) - Case Studies on Ethical Dilemmas in Technology Transfer
14	Day 27, Day 28	Class Test – 04 Final Overview of the course

Recommended Text Book:

1. Ethics in Information Technology, George Reynolds
2. Computer Ethics: Cautionary Tales and Ethical Dilemmas in Computing, Perry Morrison and Tom Forester
3. A Global Standard for Professional Ethics. Cross-Border Business Concerns, Allen, Catherine; Bunting, Robert

Course Evaluation:

- Class Test – 20 (best 2)
- Attendance – 8
- Semester Final – 72
- **Total: 100**
