

(i) Equivalent Units of Production

Units completed and transferred out = 40,000 – 6,000 = **34,000**

Output	Materials (100%)	Conversion (40% for WIP)
---------------	-------------------------	---------------------------------

Completed units	34,000	34,000
-----------------	--------	--------

Ending WIP	6,000	2,400
------------	-------	-------

Equivalent units	40,000	36,400
-------------------------	---------------	---------------

(ii) Cost per Equivalent Unit

Materials Cost per EU: $\frac{72,000}{40,000}$ =Tk. 1.80

Conversion Cost per EU: : $\frac{182,000}{36,400}$ =Tk. 5.00

(iii) Assignment of Costs

A. Transferred Out (34,000 units)

Cost	Tk.
-------------	------------

Materials: 34,000 × 1.80	61,200
--------------------------	--------

Conversion: 34,000 × 5.00	170,000
---------------------------	---------

Total	231,200
--------------	----------------

B. Ending Work in Process (6,000 units)

Cost	Tk.
-------------	------------

Materials: 6,000 × 1.80	10,800
-------------------------	--------

Conversion: 2,400 × 5.00	12,000
--------------------------	--------

Total WIP	22,800
------------------	---------------

Total Cost Reconciliation

Tk.

Transferred out 231,200

Tk.

Ending WIP 22,800

Total 254,000
