Computer Graphics Laboratory Tasks

1	Draw a line using DDA line drawing algorithm.
2	Draw a line using Bresenham's line drawing algorithm.
3	Draw a circle using mid-point circle drawing algorithm.
4	Draw a circle using a single point.
5	Draw an ellipse using mid-point ellipse drawing algorithm.
6	Fill an area with a selected color using the boundary-fill algorithm.
7	Fill an area with a selected color using the Flood-Fill Algorithm
8	Write a program to perform basic transformations on a rectangle.
9	Write a program to perform basic transformations on a triangle.
10	Write a program to perform composite transformations on a rectangle.
11	Write a program to perform composite transformations on a triangle.
12	Write a program to clip a rectangle.
13	Write a program to draw a line within a rectangle.
14	Write a program to generate a Bezier curve.
